Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office action is in response to the application filed December 4, 2003 and the preliminary amendment filed therewith whereby claims 1-18 were canceled and claims 19-27 were added.

Abstract

Applicant is reminded of the proper content of an abstract of the disclosure. A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art, as in line 1, e.g., "novel".

Applicant is reminded of the proper language and format for an abstract of the disclosure. The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "is provided", as in line 2.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3634

Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 23 recites the limitation "said first location" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19-22 and 23-27 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,506,856 (Rich *et al.* '856).

Rich *et al.* '856 disclose an item holder *for use with a perforated panel (14)* whereby the item holder comprises a support portion (bottom half of Figure 2 and including 12 and 40) and an attachment portion (top portion of Figure 2 and including 22, 26, and 28) detachably connectable to the panel (at 14) whereby the attachment portion comprises a cantilevered strap (22) provided at a first position (near 44) on the support portion (12) and a stop tab (24) located on an end of the attachment portion that is positioned above but spaced away from the first position; the attachment portion includes a slot (between 34 and 20 in Figure 2, i.e., above 28 in Figure 2) located opposite an end (the end of the strap is at the far left side of Figure 2) of the strap (22); the strap has a

Art Unit: 3634

curved shape, i.e., the strap curves upwardly at the bottom side at the end of the left side of Figure 2; the strap (22) includes a first side (unnumbered - at 22 in Figure 2) and a second side (unnumbered - angle side opposite numeral 22 in Figure 2) that taper and thereby define a tapered cross-sectional profile and the strap defining a void (unnumbered - see area between hatch marked portions at the top of Figure 2). *With respect to claims 23-27*, the attachment device (top of Figure 2 and including elements above 38) is detachably coupled (through element 40 and 44) to an item holder (bottom of Figure 2 below 38).
